PLASTIC PRODUCTS

Sadaf Production and Trading Company is recognized as one of the pioneers in the production and supply of various disposable containers in domestic and international markets. With over two decades of experience in the industry, the company has successfully met the needs of its customers in this field. Sadaf Trading Company leverages advanced global technologies and uses high-quality and standardized raw materials to produce quality and safe products for various applications. The company has managed to provide valuable and reliable services to a range of businesses and industries, from restaurants and cafés to hospitals and stores, with its extensive and diverse production of disposable containers (over 3000 product lines) including cups, bowls, plastic and foam containers, and more. Sadaf products, with their modern and attractive designs, as well as high durability and strength, are considered an ideal choice for use in any business environment.

Disposable containers are used as a suitable solution for serving food and beverages at events, restaurants, and cafés. These containers are divided into various categories, including paper, aluminum, and plastic containers. Each of these categories has its own specific features and applications. The choice of the appropriate type depends on your specific needs, the type of food being served, and environmental considerations. Plant-based containers are an ideal choice for special events due to their eco-friendly nature. Aluminum containers are suitable for cooking and storing hot foods, while plastic containers, due to their lower cost and design variety, are a popular option for everyday use.

## Products and Services

Sadaf Production and Trading Company, with the aim of enhancing the health and quality of life of people, proudly produces and offers a range of the best and highest quality products in various categories:

### Paper Disposable Containers

- **Material:** Usually made from Kraft paper or recycled paper with an internal coating resistant to moisture and grease.
- **Weight:** Lightweight and portable, varying depending on the type and design.
- **Temperature Resistance:** Typically capable of withstanding temperatures up to 100 degrees Celsius for hot foods.
- **Eco-friendly:** Biodegradable and recyclable, some types are made from renewable resources.
- **Design:** Available in various shapes and sizes (plates, cups, salad bowls, spoons, and forks).
- **Application:** Suitable for restaurants, special events, parties, picnics, and serving cold and hot foods.
- **Price:** Generally affordable and popular due to its biodegradability.

## Aluminum Disposable Containers

- Material: Made from high-quality aluminum sheets.
- Weight: Lightweight but with high strength and resistant to breakage.
- Temperature Resistance: Capable of withstanding high temperatures (up to 250 degrees Celsius) and suitable for cooking.
- Moisture Resistance: Impermeable to moisture and air, suitable for food storage.
- Design: Includes food containers, trays, aluminum foils, and specialized boxes.
- Application: Suitable for use in restaurants, cooking services, food storage, and serving hot foods.
- Price: Generally higher than paper containers but adds value due to its specific features.

PLASTIC PRODUCTS

## Plant-Based Disposable Containers

- Material: Usually made from environmentally friendly materials like corn starch or sugarcane (PLA).
- Weight: Lightweight and portable, with high durability.
- Temperature Resistance: Typically up to 70 degrees Celsius for hot foods.
- Eco-friendly: Fully biodegradable and recyclable, making it an environmentally friendly option.
- Design: Includes plates, cups, and specialized food serving containers.
- Application: Suitable for restaurants and events that prioritize environmental concerns.
- Price: Generally higher than plastic and paper containers due to higher production costs.

## Stretch Disposable Containers

- Material: Made from polyurethane or polyvinyl chloride (PVC).
- Weight: Very lightweight and flexible.
- Temperature Resistance: Resistant to various temperatures, suitable for food storage.
- Design: Available in rolls with different widths.
- Application: Suitable for packaging and storing food in restaurants or stores.
- Price: Generally lower and cost-effective.

## Pizza and Food Boxes

- Material: Usually made from sturdy cardboard or paper with moisture-resistant coating.
- Weight: Varies depending on the box size.
- Temperature Resistance: Suitable for storing pizza and hot foods.
- Design: Various designs with the option to print the brand on the box.
- Application: Suitable for restaurants and food delivery services.
- Price: Generally affordable and may vary depending on design.

## Quality and Standards

Sadaf Trading Company places special importance on the quality of its products. All production stages are conducted under strict supervision and in compliance with international standards. The company seeks to satisfy its customers and continually strives to offer the best products at competitive prices.

## Environment

The reputable Sadaf Trading Company is committed to environmental protection. The company uses raw materials that cause minimal harm to the environment and strives to reduce plastic pollution by producing paper and biodegradable containers.

## Target Market

The company's products are offered to a wide range of customers, including:

- Restaurants and cafés
- Catering centers
- Chain stores
- Government and organizational entities

The company, with the goal of improving quality of life and preserving the environment, offers diverse and high-quality products to the market. If you are looking for high-quality disposable containers, Sadaf Trading Company will be an ideal choice for you.
